

# Choosing the Right Care

---

## Nurse Line - Call 844-265-7648.

A phone call could save you money – and an emergency room visit. Instead of relying on the Internet for self-diagnosis, you can pick up the phone and talk to an RN any time. This 24/7 service is available through St. Luke's and staffed by Registered Nurses. It is FREE and can help you make sense of your symptoms and determine how and where to get the best care.

## Symptom Checker

Are you, or your child, sick or injured? St. Luke's has an interactive [Symptom Checker](#) online as a first resource for helpful information.

There are three ways to use this Symptom Checker:

- Select a body area on the image provided to see related.
- Select a body area from the list on the right
- Use the search box to search topics by keyword

If you need help using the Symptom Checker, please click the question mark in the upper-right corner of the checker.

## Urgent Care

They're open late in some locations and are a great choice for sore throats, broken bones, sprains, headaches, stomachaches, earaches, and other urgent medical conditions. With locations throughout Idaho, there's a site near you.

Urgent care costs about the same as care received at a doctor's office, which is much cheaper than the ER.
